

DRAFT #1
22 January 1980

MEMORANDUM FOR: Office of Security Members
FROM: Robert W. Gambino
Director of Security
SUBJECT: APEX

STATINTL

1. At the office staff meeting on Friday, 11 January, the principal architect of the APEX system gave us his views on the concept behind APEX and its status.

2. The President has reviewed the pros and cons of establishing a single special access control system and has decided on adopting APEX as the single system of compartmentation in the Intelligence Community. All current special access programs of compartmentation are terminated and will remain in existence only until such time as APEX is implemented. The implementation of APEX is deliberately phased to allow senior review of major milestones.

3. The President has named the DCI as Executive Agent for the National Security Council in establishing and operating APEX.

4. The DCI established two implementing mechanisms:

- a. An APEX Steering Group, with representatives from participating departments and agencies.

1. A position of Special Assistant to the DCI
for Compartmentation.

5. The CIA Member of the APEX Steering Group

STATINTL

is [REDACTED]

Room 3E63 Headquarters. [REDACTED] is Chief, Collection STATINTL
Requirements and Evaluation Staff, NFAC. His alternate is

STATINTL

[REDACTED]

STATINTL

6. [REDACTED] will be the CIA point of contact as efforts
progress to implement the APEX system.

7. I have direct and personal representation on the
Steering Group as the Chairman, DCI SECURITY COMMITTEE and
believe I will be appointed as the DCI's APEX Security
Officer.

STATINTL

8. [REDACTED] C/CSG, is the Security Advisor
to the Steering Group. [REDACTED] OGC, is the STATINTL
Legal Advisor. STATINTL

9. The Director has appointed [REDACTED]
as his Special Assistant for Compartmentation and as the
Chairman of the APEX Steering Group. [REDACTED] has a STATINTL
small APEX Control Staff composed of 4 professional level
officers. One of these is [REDACTED] who STATINTL
serves as [REDACTED] deputy. They can be reached on
[REDACTED] and currently have as
mailing address 7E12.

STATINTL

STATINTL

10. The establishment of APEX is a major undertaking that will require considerable effort on our part to make sure it works. But I do not believe it is as difficult a task as some may predict. I certainly want all of us to do everything we can to ensure its success.

11. Within the Office of Security I look to:

a. the DD/P&M to:

• coordinate through PPG all

APEX related papers sent to us by [] or STATINTL

STATINTL

[] I want prompt and thorough staffing. We must recognize that such papers will have a short deadline in most cases and I suggest that each Deputy Director set up a member as point of contact for PPG on APEX matters.

• encourage and direct the Special Security Center to play an active role in supporting the implementation of APEX particularly in participating non-NFIB departments.

• direct the Compartmented Information Branch in efforts toward converting [] and in 25X1A registering APEX special access approvals. There will be no immediate changes in the system of registering access approvals and I encourage development of new ideas and concepts by CIB personnel to make [] a STATINTL most advanced, reasonable and feasible system.

b. the DD/PTOS for considerable support in many areas:

- Area Security Officers need to be kept informed as to their role in the APEX implementation and utilization effort. Try to provide them with advance information and planning. Serve as their conduit for resolution of their questions as to policy interpretation and procedural implementations.

- Industrial Security Branch can play a considerable role in furthering the DCI's expectation for a rapid and secure transfer to the APEX system by our industrial contractors.

- There are major contributory roles to be played by others in PTOS and I ask that you direct your resources as appropriate to realize a smooth implementation.

c. the DD/PSI to:

- ensure that his elements contribute as they can to the APEX implementation. I have assured that DCID 1/14 requirements continue to apply to those nominated for access to the APEX system, including the requirements for 5 year updates. Accordingly the

investigative standards for APEX remain as now set forth. We may see a slight decrease in numbers of requests for 1/14 level investigations since under APEX there will be a considerable volume of what is now SCI material available to contractors at standard levels of classification.

12. I also know, as the Director observed, that the Community has not viewed the APEX proposal uniformly. But I want to assure you that I will participate directly and through adequately directed representation in the decision processes associated with APEX with a continuing goal of sound security. I expect your fullest cooperation.

Robert W. Gambino
